Dielectric Announces Changes to FM Sales Team

John George Rejoins Dielectric, Territory Expands for Matt Leland

RAYMOND, Maine — Feb. 3, 2009 — Dielectric Communications, a division of SPX and a leader in broadcast antenna systems, today announced changes to the company's FM sales management team. Industry veteran John George has rejoined Dielectric as regional sales manager for the southeastern U.S. In addition, Matt Leland will be assuming responsibility for West Coast sales, New England, and Canada. Together, George and Leland will facilitate sales of the company's FM antennas and accessories, assist customers in determining their system requirements, and provide long-term customer service throughout the U.S. and Canada.

George has more than 35 years of experience in the radio broadcasting industry. Starting from the ground up as a disc jockey and then progressing through programming, sales, engineering, and station ownership, George offers a unique, well-rounded perspective on radio broadcasting. He worked for Harris Corporation for six years as district sales manager for the company's radio RF and studio equipment. George served within Dielectric as regional sales manager for the southwestern U.S. for three years before joining LBA Technology as the company's vice president of sales in 2007. He now rejoins Dielectric to promote the company's FM activities within his region of expertise.

"We're very pleased to announce these changes to our dedicated FM sales team," said Dielectric President Garrett VanAtta. "Matt Leland has more than proven his success in guiding our sales efforts, and we have no doubt that he will continue to serve the company well in his new regions, reinforcing Dielectric's ongoing reputation not only for premium-quality technologies, but also for superior customer support. We're also thrilled with the return of John George to our sales team. John brings a great deal of industry knowledge

More...

with him, and with his previous experience within Dielectric, we expect a smooth transition for customers in the southeastern region.”

Dielectric is an industry leader in designing and manufacturing antenna and RF systems and has a strong reputation for providing top-notch customer support.
