Table of Contents

Introduction	2
About Dielectric®	3
Standard Filters and Combiners	
Harmonic Filters	6
POWERLITE™ Filters	12
Bandpass Filters	32
Channel Combiners	48
Single Channel Combiners	58
Standard Coaxial and Waveguide (WR) Components	
Coaxial Rigid Line Components	61
Coaxial Patch Panels	79
Coaxial Switches	85
Waveguide (WR) Line Components	95
Waveguide (WR) Switches	103
Motorized Switch Controller	111
Miscellaneous	
Standard Tuning Lines	120
Standard Directional Couplers/Probes	121
Standard Reducers/Transitions	125
Standard Loads	129

Specifications are subject to change without notice.

For over 70 years, **Dielectric** has been a leader in the telecommunications industry with products and services such as:

- Antennas
- Towers
- Installation
- Maintenance
- Transmission Lines
- Combiners/Filters
- Custom RF Systems

Engineering Expertise

With more than 25 engineers on staff and industry experience ranging over a period of more than 15 years, the expertise at Dielectric far exceeds that of other telecommunication system providers. We plan to have our products in place and working for a very long time, and under the most severe environmental conditions around the world.

Full System Solutions

Since our inception, we have considered ourselves a solution oriented engineering company, priding ourselves on our depth of scientific experience and knowledge. Clients approach us with broadcast needs and we deliver full system solutions, jointly tasking with the client engineering staff to design the most technologically advanced systems in the world. We are one of the few companies who design and manufacture the full RF System from the transmitter output through to the antenna.

Dielectric's stock-in-trade is **RF Technology**. The application of this unique technology is in control of RF signal transmission from the generating transmitter to the target of the signal. This world-wide application includes radars, nuclear experimentation, industrial processing, commercial broadcasting, and wireless communications. RF Technology is a multi-discipline that combines electrical, electronic, mechanical and civil engineering fields which are reflected through all the company's products.

History

In the beginning, more than sixty five years ago, the company's founder, Dr. Charles D. Brown, engaged in research which resulted in the use of materials with dielectric characteristics, later utilized as insulators in coaxial transmission lines for the early radars during World War II. After the war, this military development like many others was applied in a civilian field: television broadcasting.

Early in its history, Dielectric developed pressurized dry air systems, for RF transmission systems' upgraded performance. Further to this, Dielectric developed the first dehydrator that successfully surpassed military shipboard requirements. This equipment was then used to pressurize the battleship radars during Admiral Bull Halsey's successful one year campaign for the Solomon Islands.

Facilities

The company is equipped for the design, development, manufacturing and testing of a wide range of products at its factory, which is located on 77 acres in Raymond, Maine. The factory is furnished for the machining, assembling, and finishing of materials used in its products, such as: copper, aluminum, stainless steel and dielectric materials. This facility, in addition to supporting model shop and product testing along with development laboratories occupies 120,000 sq. feet. Furthermore, the company has two complete antenna ranges, a transmission line optimization benchmark, a solid state transmitter and a thermal chamber for the research and development of new products.

Products

- Coaxial and waveguide configurations, as well as open wire, balanced line configuration.
- Motor and manually actuated switches, phase shifters, tuners, impedance matchers, and probe sections with directional couplers.
- Filters and combiners in coaxial and waveguide configurations for a variety of analog and digital telecommunication standards.
- Commercial broadcast and communication antennas.
- High power loads and associated cooling systems employing fluid heat transfer design.
- Dielectric products are used in RF systems, ranging in power of megawatts and frequency of microwaves.

Design Criteria

Dielectric assures top performance of its products by managing its design activities and manufacturing practices so that performance specifications are not only met, but often exceeded. Design criteria are sometimes affected by environmental conditions, such as rigorous climatic settings, along with many others including those encountered in nuclear research facilities. These are regularly met by Dielectric products around the world.

Documentation

The documentation Dielectric is called upon to supply to its customers, is always included with the service provided. Program Management, Equipment Installation Plans and Operating Manuals are offered as documentation for all the projects which use Dielectric equipment.

Field Services

We recognize the field service assistance as a valuable feature for our customers. Dielectric sends its field technicians to supervise the installation, start-up, and also for servicing its products at numerous sites throughout the world.

Quality Control

Dielectric is an ISO 9001 certified company that has procedures for controlling quality that far exceed the given requirements. These implemented procedures are used for all products and projects undertaken.

Packing and Shipping Facilities

Equipment, large or small, requires packaging to be appropriate to the product. Whether the company sends small, fragile components or delivers heavy equipment, it plans and packages so the equipment arrives on time on site and in the same condition as it left the factory.

- Are used between transmitter output and antenna system to suppressed the undesirable harmonic's products
- The wave guide harmonic filter's rejection is unaffected by input or output components
- The Dielectric coaxial and waveguide harmonic filters are offered for all applications in VHF & UHF for standard channel bandwidths 6, 7 and 8 MHz and for custom bandwidths requirements

VHF Harmonic Filters

Frequency	Average Power Handling	Application
54-88 MHz	≤ 10 kW	ATV/DTV/MM
174-230 MHz	≤ 5 kW	ATV/DTV/MM
174-230 MHz	≤ 15 kW	ATV/DTV/MM

UHF Harmonic Filters

Frequency	Average Power Handling	Application
554-806 MHz	≤ 1.5 kW	ATV/DTV/MM
470-806 MHz	≤ 3.0 kW	ATV/DTV/MM
470-806 MHz	≤ 10 kW	ATV/DTV/MM
470-806 MHz	≤ 20 kW	ATV/DTV/MM
470-860 MHz	≤ 112.5 kW	ATV/DTV

Notes

ATV = Analog TV
 DTV = Digital TV
 MM = Mobile media

Specifications are subject to change without notice.

- Suitable for analog TV, digital TV and mobile media applications
- Indoor applications
- Low insertion loss figures
- High rejection of the harmonic products

Typical Specifications for 6 MHz TV Standard

Model Number	HVC1	HVC3
Frequency	174-230 MHz	174-230 MHz
Average Power Handling¹	≤ 5 kW	≤ 15 kW
VSWR	< 1.04	< 1.04
Insertion Loss	≤ 0.1 dB	≤ 0.1 dB

Rejection

2nd Order	> 40 dB	> 40 dB
3rd Order	> 40 dB	> 40 dB
Impedance	50 ohms	50 ohms
Connectors	1-5/8"	3-1/8"
Ambient Temperature	32°F (0°C) to 113°F (45°C)	32°F (0°C) to 113°F (45°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)	32°F (0°C) to 122°F (50°C)
Ambient/ Storage Humidity	0-98%, non condensing	0-98%, non condensing
Material	Cu-outer Silver-plated inner	Cu-outer Silver-plated inner
Dimensions (L)	41" (1,041 mm)	63.64" (1,616 mm)
Weight	7.2 lbs (3.2 kg)	17.6 lbs (8 kg)
Max. Altitude²	10,000 feet (3,050 m)	10,000 feet (3,050 m)
Application	ATV/DTV/MM	ATV/DTV/MM

Notes

- 1) Ambient temperature of 104°F (40°C), sea level, 0 PSIG
- 2) For more than 5,000 feet (1,524 m), please contact the factory.

- Suitable for analog TV, digital TV and mobile media applications
- Indoor applications
- Low insertion loss figures
- High rejection of the harmonic products

Typical Specifications for 6 MHz TV Standard

Model Number	HURN-716	HUC1
Frequency¹	554-806 MHz	470-806 MHz
Average Power Handling²	≤ 1.5 kW	≤ 3 kW
VSWR	< 1.08	< 1.04
Insertion Loss	≤ 0.1 dB	≤ 0.1 dB

Rejection

2nd Order	> 75 dB	> 40 dB
3rd Order	> 45 dB	> 40 dB
Impedance	50 ohms	50 ohms
Connectors	"N" Female / 7/16" DIN	1-5/8" EIA
Ambient Temperature	5°F (-15°C) to 113°F (45°C)	32°F (0°C) to 113°F (45°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)	32°F (0°C) to 122°F (50°C)
Ambient/ Storage Humidity	0-98%, non condensing	0-98%, non condensing
Material	Cu	Cu-outer Silver-plated inner
Dimensions (L)	7" x 4" x 1.75" (178 x 102 x 44.5 mm)	21" (534 mm)
Weight	2 lbs (0.9 kg)	4 lbs (1.8 kg)
Max. Altitude³	10,000 feet (3,050 m)	10,000 feet (3,050 m)
Application	ATV/DTV/MM	ATV/DTV/MM

HURN-716

HUC1

Notes

- 1) For frequencies over 806 MHz, please contact the factory.
- 2) Ambient temperature of 104°F (40°C), sea level, 0 PSIG
- 3) For more than 5,000 feet (1,524 m), please contact the factory.

- Suitable for analog TV, digital TV and mobile media applications
- Indoor applications
- Low insertion loss figures
- High rejection of the harmonic products

Typical Specifications for 6 MHz TV Standard

Model Number	HUC3	HUC4
Frequency¹	470-806 MHz	470-806 MHz

Dielectric **POWERLITE™** Series 600W Tunable Bandpass Filter

600 W rms, 6 Poles

- For indoor applications
- Temperature compensated
- 19" rack mountable
- For 6, 7 8 MHz channel bandwidths in analog TV, digital TV and mobile media applications

Specifications

Model Number	UTF6E-406	
Frequency	ATSC 6MHz 470-695 MHz	DVB-T 8MHz 470-862 MHz
Average Power Handling	≤ 600W DTW	
Type	REFLECTIVE	
Response Curve	STRINGENT	CRITICAL
VSWR	≤ 1.17	
Altitude ²	5,000 FT (1,524 M)	

Attenuation 6MHz ATSC (8MHz DVB-T)

F0	≤ 1.0 dB	≤ 1.0 dB
F0+/-2.69 MHz (3.80)	≥ 2.0 dB	≤ 3.50 dB
F0+/-3.5 MHz (4.20)	≥ 5 dB	≥ 15 dB
F0+/-4.5 MHz (—)	≥ 23 dB	N/A
F0+/-6.0 MHz (6.00)	≥ 33 dB	≥ 28 dB
F0+/-9.0 MHz (12.00)	≥ 40 dB	≥ 55 dB

Number Of Poles	6	8
Group Delay Variation ³	≤ 150 ns over passband	≤ 450 ns over passband
Connectors	7-16 DIN	
Ambient Temperature	32°F(0°C) to 113°F(+45°C)	
Storage Temperature	14°F(-10°C) to 122°F(+50°C)	
Ambient/Storage Humidity:	0-98%, non condensing	
Material	AL	
Dimensions (LxWxH) (Typical 6 Pole)	12.5"x4.5"x8"	
Weight	10 lbs.	

Notes

- 1) At ambient temperature 104°F (40°C), sea level, 0 PSIG
 - 2) Above 5,000 feet (1,524 m), please consult factory
 - 3) Group delay variation over the passband
- Floor mounting frame available, please contact factory.

Dielectric POWERLITE™ Series 1.5kW Tunable Bandpass Filter

- For indoor applications
- Temperature compensated
- For 6, 7 and 8 MHz channel bandwidths in analog TV, digital TV and mobile media applications
- DVB-T non-critical mask

Specifications

Model Number	UT6D7F-1.5K		
Mask	DVB-T Non-Critical	DVB-T Non-Critical	DVB-T2/EXT Non-Critical

- Are used between transmitter output and antenna system to suppress the undesirable frequency products
- Dielectric coaxial filters are tunable throughout their complete frequency range (without mechanical modifications) or within their frequency sub-bands range
- The waveguide filter is designed and built on the specified operating frequency
- The Dielectric coaxial and waveguide filters are offered for all applications in VHF & UHF for standard channel bandwidths 6, 7 and 8 MHz and for custom bandwidths requirements

VHF Bandpass Filters

Frequency	Type	Average Power Handling	Application	Response Curve	No. of Poles	Pages
54-88 MHz	R	≤ 7, 15 kW	ATV/DTV	NC	6

Notes

NC = Non-critical response (full mask, simple mask)

C = Critical response (full mask)

S = Stringent (full mask)

ATV = Analog TV

DTV = Digital TV

MM = Mobile media

R = Reflective filter

CIF = Constant impedance filter

Specifications are subject to change without notice.

Non-Critical Mask, Combine Filter

- For indoor applications
- Temperature compensated
- For 6, 7, 8 MHz channel bandwidths in analog TV, digital TV, mobile media applications

Typical Specifications for 6 MHz TV Standard

Model Number	VF6E15F
Frequency	54-88 MHz
Average Power Handling ¹	≤ 7 kW-15 kW
Type	Reflective
Response Curve	Non-critical (Full mask)
Temperature Compensated	Yes
VSWR	< 1.1
Max. Altitude ²	10,000 feet (3,050 m)

Attenuation 6 MHz ATSC

F0	< 0.2 dB
F0 +/-2.69 MHz	< 0.35 dB
F0 +/-3.00 MHz	N/A
F0 +/-3.25 MHz	N/A
F0 +/-3.50 MHz	> 0.05 dB
F0 +/-4.50 MHz	> 11.6 dB
F0 +/-6.00 MHz	> 30 dB
F0 +/-9.00 MHz	> 64 dB

Number of Poles	6
Group Delay Variation	< 150 ns over passband
Hybrids	N/A
Connectors	1-5/8" EIA/ 3-1/8" EIA
Temperature Stability	~10 kHz / °F
Blowers & Shrouds	No
Ambient Temperature	68°F (20°C) to 95°F (35°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Ambient/Storage Humidity	0-98%, non condensing
Material	Al with Invar rods
Dimensions L x W x H	47" x 31.4" x 55" (1.2 x 0.8 x 1.4 m)
Weight	503 lbs (228 Kg)
Application	ATV/DTV

Notes

- 1) At ambient temperature 77°F (25°C), sea level, 0 PSIG
- 2) For more than 5,000 feet (1,524 m), please consult the factory.

Critical Mask, Pseudo-Elliptic Response

- For indoor applications
- Temperature compensated
- For 6, 7, 8 MHz channel bandwidths in analog TV, digital TV, mobile media applications

Typical Specifications for 6 MHz TV Standard

Model Number	VF8E11F
Frequency	54-88 MHz
Average Power Handling ¹	≤ 7 kW-20 kW
Type	Reflective
Response Curve	Critical
Temperature Compensated	Yes
VSWR	< 1.1
Max. Altitude ²	10,000 feet (3,050 m)

Attenuation 6 MHz ATSC

F0	< 0.25 dB
F0 +/-2.69 MHz	< 0.65 dB
F0 +/-3.00 MHz	< 3.65 dB
F0 +/-3.25 MHz	> 23 dB
F0 +/-3.50 MHz	N/A
F0 +/-4.50 MHz	N/A
F0 +/-6.00 MHz	N/A
F0 +/-9.00 MHz	> 64 dB

Number of Poles	8
Group Delay Variation	< 400 ns over passband
Hybrids	N/A
Connectors	1-5/8" EIA/ 3-1/8" EIA
Temperature Stability	< 50 kHz shift over temperature range
Blowers & Shrouds	No
Ambient Temperature	68°F (20°C) to 95°F (35°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Ambient/Storage Humidity	0-98%, non condensing
Material	Al with Invar rods
Dimensions L x W x H	43" x 24" x 50" (1.0 x 0.6 x 1.3 m)
Weight	670 lbs (304 kg)
Application	ATV/DTV

Notes

- 1) At ambient temperature 77°F (25°C), sea level, 0 PSIG
- 2) For more than 5,000 feet (1,524 m), please consult the factory.

Non-Critical Mask, Combine Filter

- For indoor applications
- For 6, 7, 8 MHz channel bandwidths in analog TV, digital TV, mobile media applications
- Temperature compensated
- CIF version used for low return loss application requirements

Typical Specifications for 6 MHz TV Standard

Model Number	CIF-VF6E15F
Frequency	54-88 MHz
Average Power Handling ¹	≤ 15 kW-25 kW
Type	CIF
Response Curve	Non-critical (Full mask)
Temperature Compensated	Yes
VSWR	< 1.06
Max. Altitude ²	10,000 feet (3,050 m)

Attenuation 6 MHz ATSC

F0	< 0.2 dB
F0 +/-2.69 MHz	< 0.35 dB
F0 +/-3.00 MHz	N/A
F0 +/-3.25 MHz	N/A
F0 +/-3.50 MHz	> 0.05 dB
F0 +/-4.50 MHz	> 11.6 dB
F0 +/-6.00 MHz	> 30 dB
F0 +/-9.00 MHz	> 64 dB

Number of Poles	6
Group Delay Variation	< 150 ns over passband
Hybrids	Coaxial
Connectors	1-5/8" EIA/ 3-1/8" EIA
Temperature Stability	~10 kHz / °F
Blowers & Shrouds	No
Ambient Temperature	68°F (20°C) to 95°F (35°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Ambient/Storage Humidity	0-98%, non condensing
Material	Al with Invar rods
Dimensions L x W x H	64" x 60" x 70" (1.6 x 1.5 x 1.8 m)
Weight	1155 lbs (524 kg)
Application	ATV/DTV

Notes

- 1) At ambient temperature 77°F (25°C), sea level, 0 PSIG
- 2) For more than 5,000 feet (1,524 m), please consult the factory.

Critical Mask, Pseudo-Elliptic Response

- For indoor applications
- For 6, 7, 8 MHz channel bandwidths in analog TV, digital TV, mobile media applications
- Temperature compensated
- CIF version used for low return loss application requirements

Typical Specifications for 6 MHz TV Standard

Model Number	CIF-VF8E11F
Frequency	54-88 MHz
Average Power Handling ¹	≤ 15 kW-25 kW
Type	CIF
Response Curve	Critical (Full mask)
Temperature Compensated	Yes
VSWR	< 1.06
Max. Altitude ²	10,000 feet (3,050 m)

Attenuation 6 MHz ATSC

F0	< 0.25 dB
F0 +/-2.69 MHz	< 0.65 dB
F0 +/-3.00 MHz	< 3.65 dB
F0 +/-3.25 MHz	> 23 dB
F0 +/-3.50 MHz	N/A
F0 +/-4.50 MHz	N/A
F0 +/-6.00 MHz	N/A
F0 +/-9.00 MHz	> 64 dB

Number of Poles	8
Group Delay Variation ³	< 400 ns over passband
Hybrids	Coaxial
Connectors	1-5/8" EIA/ 3-1/8" EIA
Temperature Stability	< 50 kHz shift over temperature range
Blowers & Shrouds	No
Ambient Temperature	68°F (20°C) to 95°F (35°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Ambient/Storage Humidity	0-98%, non condensing
Material	Al with Invar rods
Dimensions L x W x H	85" x 48" x 68" (2.1 x 1.2 x 1.7 m)
Weight	1540 lbs (700 kg)
Application	ATV/DTV

Notes

- 1) At ambient temperature 77°F (25°C), sea level, 0 PSIG
- 2) For more than 5,000 feet (1,524 m), please consult the factory.

Non-Critical Mask, Interdigital Filter

- For indoor applications
- Temperature compensated
- For 6, 7, 8 MHz channel bandwidths in analog TV, digital TV, mobile media applications

Typical Specifications for 6 MHz TV Standard

Model Number	HF7T10I-10K
Frequency	174-230 MHz
Average Power Handling ¹	≤ 10 kW
Type	Reflective
Response Curve	Non-critical
Temperature Compensated	Yes
VSWR	< 1.1
Max. Altitude ²	10,000 feet (3,050 m)

Attenuation 6 MHz ATSC

F0	< 0.3 dB
F0 +/-2.69 MHz	< 0.45 dB
F0 +/-3.00 MHz	N/A
F0 +/-3.25 MHz	N/A
F0 +/-3.50 MHz	> 0.05 dB
F0 +/-4.50 MHz	> 11.6 dB
F0 +/-6.00 MHz	> 30 dB
F0 +/-9.00 MHz	> 64 dB

Number of Poles	7
Group Delay Variation	< 150 ns over passband
Hybrids	N/A
Connectors	1-5/8" EIA/ 3-1/8" EIA
Temperature Stability	~10 kHz / °F
Blowers & Shrouds	No
Ambient Temperature	68°F (20°C) to 95°F (35°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Ambient/Storage Humidity	0-98%, non condensing
Material	Al with Invar rods
Dimensions L x W x H	86.3" x 12" x 23" (2.2 x 0.3 x 0.6 m)
Weight	300 lbs (136 kg)
Application	ATV/DTV

Notes

- 1) At ambient temperature 77°F (25°C), sea level, 0 PSIG
- 2) For more than 5,000 feet (1,524 m), please consult the factory.

Optional ceiling mount available. Please contact factory.

Critical Mask, Pseudo-Elliptic Response

- For indoor applications
- Temperature compensated
- For 6, 7, 8 MHz channel bandwidths in analog TV, digital TV, mobile media applications

Typical Specifications for 6 MHz TV Standard

Model Number	HF9T10I-10K
Frequency	174-230 MHz
Average Power Handling ¹	≤ 10 kW
Type	Reflective
Response Curve	Critical (Full mask)
Temperature Compensated	Yes
VSWR	< 1.1
Max. Altitude ²	10,000 feet (3,050 m)

Attenuation 6 MHz ATSC

F0	< 0.25 dB
F0 +/-2.69 MHz	< 0.65 dB
F0 +/-3.00 MHz	< 3.65 dB
F0 +/-3.25 MHz	> 18 dB
F0 +/-3.50 MHz	N/A
F0 +/-4.50 MHz	N/A
F0 +/-6.00 MHz	N/A
F0 +/-9.00 MHz	> 64 dB

Number of Poles	9
Group Delay Variation	< 450 ns over passband
Hybrids	N/A
Connectors	1-5/8" EIA/ 3-1/8" EIA
Temperature Stability	< 50 kHz shift over temperature range
Blowers & Shrouds	No
Ambient Temperature	68°F (20°C) to 95°F (35°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Ambient/Storage Humidity	0-98%, non condensing
Material	Al with Invar rods
Dimensions L x W x H	79" x 24" x 24.3" (2.0 x 0.6 x 0.6 m)
Weight	400 lbs (182 kg)
Application	ATV/DTV

Notes

- 1) At ambient temperature 77°F (25°C), sea level, 0 PSIG
- 2) For more than 5,000 feet (1,524 m), please consult the factory.

Optional ceiling mount available. Please contact factory.

Non-Critical Mask, Interdigital Filter

- For indoor applications
- For 6, 7, 8 MHz channel bandwidths in analog TV, digital TV, mobile media applications
- Temperature compensated
- CIF version used for low return loss application requirements

Typical Specifications for 6 MHz TV Standard

Model Number	CIF-HF7T101
Frequency	174-230 MHz
Average Power Handling ¹	≤ 10 kW-20 kW
Type	CIF
Response Curve	Non-critical (Full mask)
Temperature Compensated	Yes
VSWR	< 1.06
Max. Altitude ²	10,000 feet (3,050 m)

Attenuation 6 MHz ATSC

F0	< 0.3 dB
F0 +/-2.69 MHz	< 0.45 dB
F0 +/-3.00 MHz	N/A
F0 +/-3.25 MHz	N/A

Floor mounting frame available; please contact the factory.

- Are used to combine two or more channels on one antenna system
- Dielectric offers a broad range of channel combiners for dual or multiple channels in combination with switching units for customized applications
- The combiners are designed for all applications in VHF, UHF band, for standard channel bandwidths 6, 7 and 8 MHz and for custom bandwidths requirements.
- The standard types available are:
 - CIF
 - Branch (star point)
 - Manifold
- **CIF-Constant Impedance Filter balanced combiner** module is used mainly for adjacent channel situations and can be easily extended or be combined with any other combiners like: manifold, branch, or directional waveguide filter combiners.

A CIF combiner module consists of a balanced pair of band pass filters, two 3 dB couplers and a balancing load. The transmitter signal is fed into the NB (narrow band) input, the channels previously combined or another single channel is fed to the WB (wide band) input and the combined output is directed to the antenna system or to the next wide band input of the next module (a cascade multi-channel combiner configuration).
- **Branch or star point combiners** use a band pass filter per transmitter/channel to be combined, that are connected to a common output. It is the most economical solution for two channels wide frequency spaced. They are available in a coaxial or waveguide version depending on the power handling requirement.
- **Manifold combiner** consists of a band pass filter for each the transmitter/channel, a TEE junction for each input frequency and a short circuit stub. They are built in coaxial or waveguide versions. It is an economical solution for multichannels combining with a minimum of two channels spacing in between.

VHF Combiners

Type	Frequency	Total Average Power	Mask Filters	Pages
CIF	54-88 MHz	≤ 25 kW	ATV/DTV	50-51
CIF	174-230 MHz	≤ 7 kW, 25 kW	ATV/DTV	52-53

UHF Combiners

Type	Frequency	Average Power Handling	Application	Pages
CIF	470-860 MHz	≤ 0.4 kW, 0.5 kW	ATV/DTV	54 to 55
CIF	470-860 MHz	≤ 3.0 kW	ATV/DTV	
CIF	470-860 MHz	≤ 5.0 kW	ATV/DTV	
CIF	470-860 MHz	≤ 15 kW to 75 kW	ATV/DTV	

Branch	470-860 MHz	≤ 15 kW, 25 kW	ATV/DTV/MM	56
--------	-------------	----------------	------------	----

Manifold	470-860 MHz	≤ 110 kW	ATV/DTV	57
----------	-------------	----------	---------	----

Notes

DTV = Digital TV (ATSC/DVB/ISDB-T)

ATV = Analog TV (NTSC, PAL, SECAM)

MM = Mobile media

Specifications are subject to change without notice.

With Filters (CIF)

- Suitable for analog and digital TV or mobile media applications
- Temperature compensated
- Low VSWR
- Dielectric is offering the CIF channel combiner with filters, tuned for mask filter requirements too

Typical Specifications for 6 MHz TV Standard

Model Number	CLV2CN62
Total Average Power ¹	25 kW

Max. Altitude ⁴	10,000 feet (3,050 m)	10,000 feet (3,050 m)	10,000 feet (3,050 m)
Application	ATV/DTV	ATV/DTV	ATV/DTV

Notes

- 1) At ambient temperature 104°F (40°C), sea level, 0 PSIG
 - 2) Group delay variation over the pass band
 - 3) By reducing the average input at NB input, half of the power reduced can be added to the WB input
 - 4) For more than 5,000 feet (1,524 m), please contact the factory.
- Floor mounting frame available; please contact the factory.

With Filters (CIF), Elliptical Response

- Suitable for analog and digital TV or mobile media applications
- Temperature compensated
- Low VSWR
- Dielectric is offering the CIF channel combiner with filters, tuned for mask filter requirements too

Typical Specifications for 6 MHz TV Standard

Application	ATV/DTV

Notes

- 1) Measured at 104°F (40°C), sea level, 0 PSIG
 - 2) For more than 5,000 feet (1,524 m), please contact the factory
- Floor mounting frame available; please contact the factory.

- Are used to combine two or more power amplifiers
- The single channel combiners are designed for all applications in UHF band, for standard channel bandwidths 6, 7 and 8 MHz and for custom bandwidths requirements

As standard single channel combiner type we do have available:

- **Switchless Combiner** that consists of a pair of phasers, a 3 dB hybrid, a magic TEE and a reject load. This device allows two power amplifiers on the same channel to combine in three different ways of operation with no off-air interruption in switching between the three modes:
 - AMP A + AMP B to antenna
 - AMP A to antenna and AMP B to reject load
 - AMP B to antenna and AMP A to reject load.

UHF Single Channel Combiners

Type	Frequency	Total Average Power	Mask Filters
Switchless	470-860 MHz	≤ 66 kW, 140 kW, 230 kW	ATV/DTV

Notes

DTV = Digital TV (ATSC/DVB/ISDB-T)

ATV = Analog TV (NTSC, PAL, SECAM)

MM = Mobile media

Specifications are subject to change without notice.

- Suitable for analog and digital TV applications
- Cost effective solution for a single channel combiner
- No "off air" time during switching
- Three modes of operation: TXA + TXB to antenna, TXA to antenna, TXB to antenna
- Low VSWR

Typical Specifications for 6 MHz TV Standard

Model Number	CU181S23	CU151S23	CU111S23

Application	ATV/DTV	ATV/DTV	ATV/DTV

Notes

- 1) At ambient temperature 104°F (40°C, sea level, 0 PSIG). For higher power values, please contact the factory.
 - 2) Available as 3 dB or 4.77 dB combiner type
 - 3) For more than 5,000 feet (1,524 m), please contact the factory.
- Floor mounting frame available; please contact the factory.

Dielectric is the world's largest manufacturer of Rigid Coaxial Transmission Line. Our experience and record of reliable service, and superior quality, as well as our ongoing research and development programs have kept us the leader in our field. Dielectric manufactures rigid coaxial transmission lines in sizes ranging from 7/8" to 12". Outer conductor material is available in aluminum in certain sizes. More TV and radio stations, utilizing rigid Coax Transmission Line, are on the air with Dielectric.

Features

High Conductivity Copper

Dielectric's volume allows us to purchase entire mill runs (to our specifications) of high conductivity copper tubing, 95% ICAS/99.04% purity, providing Transmission Line of constant impedance and continuous high power capacity and low insertion loss.

Welded Construction

All of Dielectric's factory installed flanges and joints are Tungsten Inert Gas Welded to ensure structural integrity and long life.

Inner Conductor Support

Dielectric uses superior low loss PTFE disc type insulators (not pin or rod type supports) for long term reliability and service. Dielectric's line also utilizes a unique magneform process for insulator support undercuts. With magneforming, undercuts are magnetically formed rather than rolled or welded, allowing the use of a continuous inner conductor with excellent mechanical and electrical characteristics.

Heavy Wall Tubing

Dielectric uses heavy wall tubing in most miter elbows. In critical locations requiring extraordinary support, such as the bottom elbow on vertical runs, additional reinforcing is added.

Flanged

- For outdoor and indoor installation; includes the EIA standard

Unflanged

- For indoor installation only

EIA-Flanged Rigid Line

Size	Average Power*			
	108 MHz	230 MHz	776 MHz	860 MHz

1-5/8"	≤ 15 kW	≤ 10 kW	N/A	≤ 5 kW
3-1/8"	≤ 50 kW	≤ 33 kW	N/A	≤ 17 kW
4-1/16"	≤ 87 kW	≤ 57 kW	N/A	≤ 28 kW
6-1/8"	≤ 170 kW	≤ 118 kW	≤ 63 kW	N/A

Notes

*104°F (+40°C) ambient temperature, 145°F (63°C) outer temperature, 248°F (120°C) inner temperature, sea level, 0 PSIG, VSWR=1.0.

Sizes like: 75 Ohms, 6-1/8", 7-3/16", 8-3/16" and 9-3/16" for custom applications are available on request. Please call the factory for details.

Specifications are subject to change without notice.

Dielectric® Standard Coaxial 1-5/8" EIA Rigid Line Components

- Low insertion loss
- Low VSWR
- Outdoor/indoor applications
- Low loss PTFE® insulator
- Works in pressurized systems
- High conductivity Cu

Specifications

Impedance	50 ohms
Peak Voltage¹ at Sea Level	4.0 kV
Peak Power at Sea Level	320 kW
Frequency Range	0 ≤ F ≤ 1.0 GHz
Max. Altitude²	10,000 feet (3,050 m)
Ambient Temperature	32°F (0°C) to 113°F (45°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Storage/Ambient Humidity	0-98% non condensing

Average Power³

108 MHz	≤ 15 kW
230 MHz	≤ 10 kW
860 MHz	≤ 5.4 kW

Loss/100 feet³

108 MHz	0.223 dB
230 MHz	0.305 dB
860 MHz	0.597 dB

Notes

- 1) Peak voltage rating based on 4:1 margin of safety to theoretical. Peak power rating is calculated from peak voltage rating using the formula:

$$P_{pk} = (V_{pk})^2 / Z_0$$
- 2) For more than 5,000 feet (1,524 m), please consult the factory.
- 3) 104°F (+40°C) ambient temperature, 145°F (63°C) outer temperature, 248°F (120°C) inner temperature, sea level, 0 PSIG, VSWR=1.0
- 4) Transmission Line components must not be exposed to condensing moisture environments unless fully assembled and pressurized.
- 5) For outdoor applications, please contact the factory.

Model Number	Weight	VSWR ² 108 MHz	VSWR ² 230 MHz	VSWR ² 776 MHz
DC 675-018	31 lbs (14.06 kg)	1.03	1.03	1.03

Soft Solder Flange³

Model Number	Weight
DC 670-014	7 lbs (3.18 kg)

Anchor Inner Connector

Model Number	Weight	Notes
DC 675-011	2 lbs (0.91 kg)	includes insulator

Notes

- 1) Includes Anchor Inner Connector, one O-ring and one hardware kit.
- 2) 104°F (+40°C) ambient temperature, 145°F (63°C) outer temperature, 248°F (120°C) inner temperature, sea level, 0 PSIG
- 3) Includes solder, liquid flux, brush, garnet paper and cleaner.
- 4) Does not include the weight of the flanges and anchor inner connector.

Dielectric® Standard Coaxial 1-5/8" Unflanged Rigid Line Components

- Low insertion loss
- Low VSWR
- Indoor applications
- Easy installation
- Low loss PTFE® insulator
- High conductivity Cu

Specifications

Impedance	50 ohms
Peak Voltage¹ at Sea Level	4 kV
Peak Power at Sea Level	320 kW
Frequency Range	$0 \leq F \leq 1.0$ GHz
Max. Altitude²	10,000 feet (3,050 m)
Ambient Temperature	32°F (0°C) to 113°F (45°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Storage/Ambient Humidity	0-98% non condensing

Average Power³

108 MHz	≤ 15 kW
230 MHz	≤ 10 kW
860 MHz	≤ 5 kW

Loss/100 feet³

108 MHz	0.223 dB
230 MHz	0.305 dB
860 MHz	0.597 dB

Notes

- 1) Peak voltage rating based on 4:1 margin of safety to theoretical.
- 2) For more than 5,000 feet (1,524 m), please consult the factory.
- 3) 104°F (+40°C) ambient temperature, 145°F (63°C) outer temperature, 248°F (120°C) inner temperature, sea level, 0 PSIG, VSWR=1.0
- 4) Transmission Line components must not be exposed to condensing moisture environments unless fully assembled and pressurized.
- 5) For outdoor applications, please contact the factory.

- 2) Includes one Anchor Inner Connector, and two hose clamps.

- Used for patching or break transmitter's paths in single, half, back-up, etc.
- Used to patch the transmitter's output to dummy load, between main and standby antennas, bypassing intermediate RF systems (combiners, splitters, etc.)
- The switch is carry-on manually with U-links help
- Interlock switches included
- Input/output connectors are on the back of the patch panels
- Low-cost alternative to multi connection routing situations

Notes

Dielectric can design and supply coaxial patch panels in custom configurations for special requirements.

Leading the broadcast industry for over a half century.

Founded in 1942, Dielectric continues to be at the forefront of RF component design and manufacture. Whether the transmission format is analog or digital, Dielectric's conservative design philosophy will ensure the highest quality and most reliable products are available to you, our customer.

Quality components keep you on the air.

For the broadcaster, every second off the air is lost revenue. Therefore, each component in your broadcast system must be of the highest quality available. Dielectric's reputation for engineering excellence is recognized throughout the world. When emergency parts or services are needed, you can count on Dielectric to provide assistance and help to get you back on the air.

Reliability is everything.

Keeping the signal transmitting without interruption is the result of system components designed to the highest standards. The 50000 Series motorized coaxial switch introduced in 1978 has become the standard in the industry for its reliability and unmatched isolation characteristics.

We've recently enhanced our popular 50000 Series switch, and created the 60000 Series switch. The 60000 series switch is using single pole double throw type limit switches, used for readout and position indication. They ensure that the switch is always in the correct position.

In addition, the 60000 Series switch may be operated locally with no customer input wiring, a distinct advantage for simple system set up and maintenance. The 60000 Series switch is a direct drop in replacement for existing 50000 Series switches.

Features

- Used to automatically patch the transmitter's output to dummy load, between main and standby antennas, bypassing intermediate RF systems (combiners, splitters, etc.)
- Switching is accomplished using a motor drive. Manual option is also available which is especially useful in emergency situations.
- Simple setup and maintenance
- Pressurized upon request
- Remote control option
- 12/24 VDC or 115/230 VAC control voltage options available with no field modifications

Control and Monitor Connector Pin Assignment Diagram

Electrical Block Diagram

Dielectric Communications has been a major supplier of large high power waveguide to the microwave industry for the past two decades. This experience has resulted in design, manufacturing, and testing techniques that represent the current state-of-the art.

The High Power Alternative

Each form of transmission line has certain features which make its use more advantageous over other types of transmission systems. For UHF television applications, waveguide is particularly attractive because it out performs coaxial transmission line in virtually every area of importance. Waveguide can handle power levels far in excess of coaxial line ratings. Because there is no center conductor, waveguide is much less susceptible to shock and vibration during shipping and installation. No center conductor means no insulators and consequently lower loss.

Complete Systems

Dielectric's product line includes not only individual waveguide components and accessories, but integrated waveguide feed systems as well. Typical feed systems include such items as straight waveguide, sweeps and elbows, mitre bends, twists, switches, couplers, and other components as required for a specific application. In order to provide system compatibility, each component must be manufactured with stringent electrical and mechanical controls.

Quality Manufacturing

Extreme care is taken to ensure a superior surface finish on the flanges. Flange flatness tolerances do not exceed a total deviation over 5 to 10 mils on a flange face. Deviations exceeding these dimensional tolerances can result in serious arcing at the flange junction in a high power system. Another unique process welds the flanges in a manner that prevents localized distortion, thus minimizing the periodic VSWR spike that is often characteristic of transmission line systems. Facing the flanges, after welding, ensures accurate parallelism, thus minimizing interface discontinuities.

Precision Welding

Dielectric's waveguide is spayarc argon® welded by unique techniques using precision tooling and fixtures. These techniques eliminate distortion and bow by maintaining uniform stress loading and uniform weld penetration. Consequently, mechanical stability is attained and performance degradation of the guide with aging is eliminated. This is extremely important in long waveguide runs where low VSWR is necessary.

WR Line

Size	Frequency		
	470-494 MHz	494-680 MHz	650-880 MHz

Leading the broadcast industry for over a half century.

Founded in 1942, Dielectric continues to be at the forefront of RF component design and manufacture. Whether the transmission format is analog or digital, Dielectric's conservative design philosophy will ensure the highest quality and most reliable products are available to you, our customer.

Quality components keep you on the air.

For the broadcaster, every second off the air is lost revenue. Therefore, each component in your broadcast system must be of the highest quality available. Dielectric's reputation for engineering excellence is recognized throughout the world. When emergency parts or services are needed, you can count on Dielectric to provide assistance and help to get you back on the air.

Features

- Are used for switch or break transmitter's paths in single, half, back-up, etc.
- Also used to automatically patch the transmitter's output to dummy load, between main and standby antennas, bypassing intermediate RF systems (combiners, splitters, etc.)
- The switch is accomplished using a motor drive. Manual option is also available which is especially useful in emergency situations.
- WR Switches may be mounted in any position
- Simple setup and maintenance

4-Port Motorized Switches

Size	Frequency			Motor Drive
	470-494 MHz	494-680 MHz	650-880 MHz	
WR 1800	Yes	N/A	N/A	115/230 V AC, 60/50 Hz

Control and Monitor Connector Pin Assignment Diagram

Electrical Block Diagram

The unit is fully self-contained and housed in a 3.5 inch rack mounted chassis. The unit provides either local or remote control of two RF switched. The controller design uses a Programmable Logic Controller (PLC) to sense the inputs from the RF switch and produces the required timing and output commands to the RF switch. The relay control voltage for the RF switch is selectable on the rear of the Dual Switch Controller. Multi-mode of operation can be selected from touch panel interface. When LOCAL is selected, the RF switches can only be electrically controlled from the panel. When REMOTE is selected, the RF switched can only be electrically controlled remotely, or from web interface. When in LOCKOUT mode there is no electrical control.

Features

- Local and remote control and monitoring
- Easy to use, touch screen local interface
- Remote web control
- Normally closed transmitter interlock connection
- Custom setting for transmitter interlock delay
- Dual built-in control voltage selection (12 V DC or 24 V DC)

4-Port Motorized Controller

Item	AC Power	Contr. Relay Voltage
Dual Universal Controller	120-240 V AC, 50/60 Hz	12/24 V DC

Specifications are subject to change without notice.

- Allows control of one or two 2-ways switches (coaxial or WR)
- Local, remote or lockout operation
- Adjustable delay in switching
- 12 V DC or 24 V DC voltage control relay selection

Specifications

Model Number	DSC2
Part Number	11000010590
Dimensions (H x W x D)	5.25" x 19" x 8" (133.3 mm x 482.6 mm x 203 mm)
AC Power Requirements	110-240 V AC/50-60 Hz
AC Power Consumption (Controller only)	40 W

Loading of Remote Control Contacts

Operating Voltage	≤ 24 V DC
Operating Current	< 0.5 Amps

Loading of interlock contacts

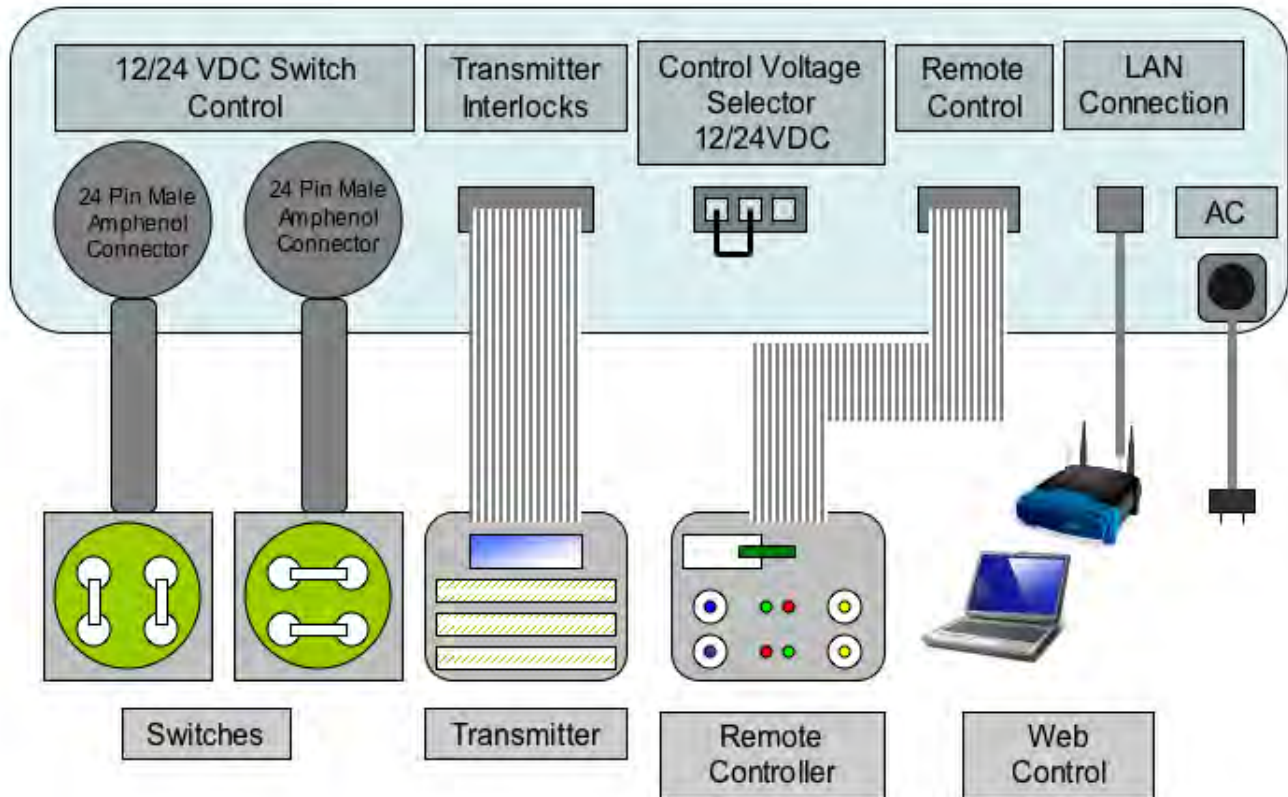

Operating voltage	<=30V DC or <=250V AC
Operating current	<=3A

Control Relay Voltage	12 V DC, 24 V AC
Ambient Temperature	32°F (0°C) to 122°F (50°C)
Storage Temperature	-4°F (-20°C) to 158°F (70°C)
Storage/Ambient Humidity	0-90% non condensing
Weight (with U-link)	12.5 lbs (5.7 kg)

Notes

For custom controllers, please contact the factory.

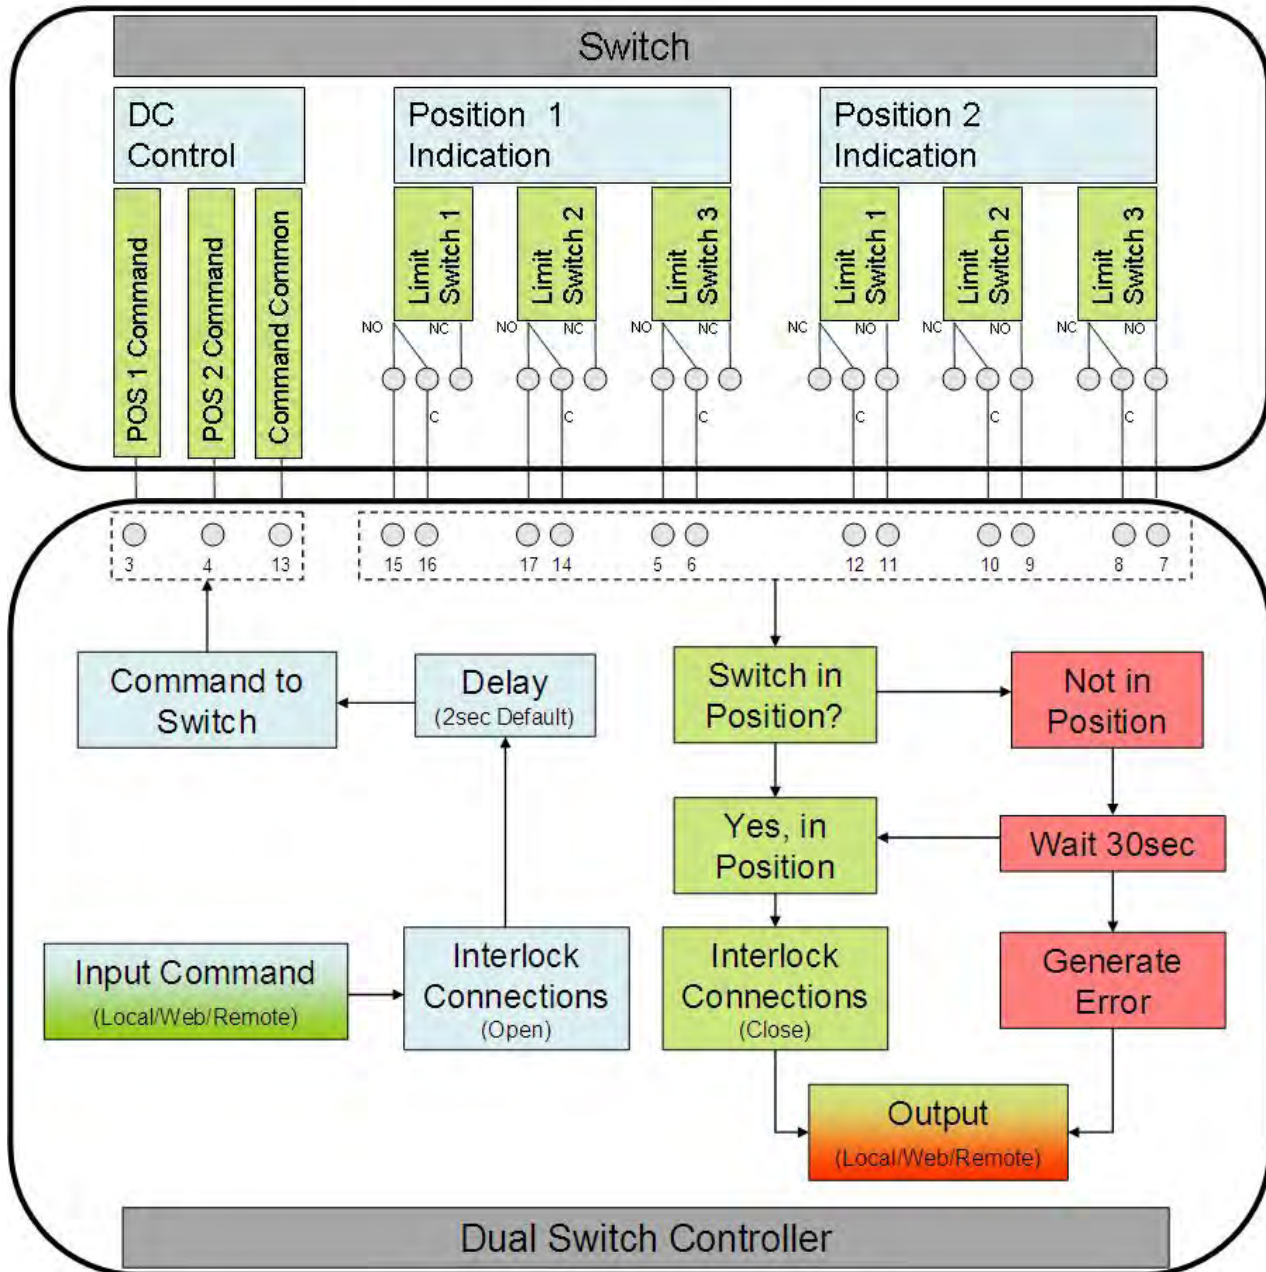

Dual Switch Controller Input-Output Connections

Notes

For custom controllers, please contact the factory.

Dual Switch Controller Block Diagram

Notes

- 1) Switch-dual switch controller interface: 24 pin male amphenol connector.
- 2) Pins 5/6 and 11/12 are used inside the dual switch controller for switch position indication and are not routed to the interlock connections. Pins 15/16, 14/17, 9/10 and 7/8 are routed through the PLC to the interlock connections.
- 3) For custom controllers, please contact the factory.

- A comprehensive offer to facilitate measuring and maintenance work
- Offer tuning lines for improving VSWR directional couplers for measuring FWD and RFL power
- Adapters for different sizes of international connector systems

Standard Tuning Elements

Item	Page
UHF Coaxial Straight Line Tuning	133
Tunable UHF Elbow	134
UHF Waveguide (WR) Straight Line Tuning	135

Standard Directional Couplers/Probes

Item	Page
Standard Coaxial Directional Coupler with 1 or 4 Probes	136-137
Standard Waveguide Directional Coupler with 1 or 4 Probes	138-139

Standard Adapter/Reducers

Item	Page
Standard Coaxial Flanged Reducers	140
Standard WR 1800 to Coaxial Transitions	141
Standard WR 1500 to Coaxial Transitions	142
Standard WR 1150 to Coaxial Transitions	143

Standard Loads

Item	Page
Coaxial Water Column Load	144
Waveguide (WR) Water Column Load	145

Specifications are subject to change without notice.

- Used to improve VSWR
- Indoor applications
- Available with 4 tuning screws

Specifications

Model Number	TUC1-4	TUC3-4	TUC4-4	TUC6-4
Input/output Connectors	1-5/8" EIA	3-1/8" EIA	4-1/16" FLG	6-1/8" EIA

Notes

- 1) For more than 5,000 feet (1,524 m), please consult the factory.
- 2) 104°F (40°C) ambient temperature, sea level, 0 PSIG.
- 3) Maximum average power handling is equal with the one of the coaxial line's size.

- Used to facilitate WR to coaxial transition
- Indoor applications

Specifications

Impedance	50 ohms
Frequency Range	$494 \leq F \leq 680$ MHz
Ambient Temperature	32°F to 113°F (0°C to 45°C)
Storage Temperature	32°F to 122°F (0°C to 50°C)
Storage/Ambient Humidity	0-98%, non condensing
Max. Altitude¹	10,000 feet (3,050 m)
VSWR²	< 1.1

Model Number	W15-1	W15-3	W15-4	W15-6
WR 1500 to Coaxial	1-5/8" EIA	3-1/8" EIA	4-1/16" FLG	6-1/8" EIA
Peak Voltage at Sea Level	4 kV	7.8 kV	11 kV	15.6 kV
Peak Power at Sea Level	320 kW	1,216.8 kW	2,420 kW	4,867.2 kW
Weight	12 lbs (5.5 kg)	13.8 lbs (6.3 kg)	14.8 lbs (6.7 kg)	16.8 lbs (7.6 kg)

Notes

- 1) For more than 5,000 feet (1,524 m), please consult the factory.
- 2) 104°F (40°C) ambient temperature, sea level, 0 PSIG.
- 3) Maximum average power handling is equal with the one of the coaxial line's size.

- Used to facilitate WR to coaxial transition
- Indoor applications

Specifications

Impedance	50 ohms
Frequency Range	$650 \leq F \leq 880$ MHz
Ambient Temperature	32°F to 113°F (0°C to 45°C)
Storage Temperature	32°F to 122°F (0°C to 50°C)
Storage/Ambient Humidity	0-98%, non condensing
Max. Altitude¹	10,000 feet (3,050 m)
VSWR²	< 1.1

Model Number	W11-1	W11-3	W11-4	W11-6
WR 1150 to Coaxial	1-5/8" EIA	3-1/8" EIA	4-1/16" FLG	6-1/8" EIA ⁴
Peak Voltage at Sea Level	4 kV	7.8 kV	11 kV	15.6 kV
Peak Power at Sea Level	320 kW	1,216.8 kW	2,420 kW	4,867.2 kW
Weight	9.5 lbs (4.3 kg)	10.7 lbs (4.9 kg)	11.8 lbs (5.4 kg)	13.7 lbs (6.2 kg)

Notes

- 1) For more than 5,000 feet (1,524 m), please consult the factory.
- 2) 104°F (40°C) ambient temperature, sea level, 0 PSIG.
- 3) Maximum average power handling is equal with the one of the coaxial line's size.
- 4) Maximum frequency available is 776 MHz.

Specifications

Model Number	LLU60K6
Input/output connectors¹	6-1/8" EIA
Impedance	50 ohms
Tuning screws	N/A
Frequency Range	470-806 Mhz
Average Power at Sea Level²	Same as input line size rating
Operating Position	Horizontal; water outlet up
Cooling Method³	Forced mixture of 50/50 water-ethylene glycol
Inlet Water Pressure (Max.)	80 psi (5.4 atm)
Inlet Water Temperature⁴	102°F to 131°F (39°C to 55°C)
Outlet Water Temperature (Max.)	194°F (90°C)
Inlet/Outlet Water Connectors	1" NTP
Max. Altitude⁵	10,000 feet (3,050 m)
Ambient Temperature	41°F (5°C) to 113°F (45°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)
Storage/Ambient Humidity	0-98%, non condensing
Length	37" (940 mm)
Weight	40 lbs (18.1 kg)

Notes

- 1) 3-1/8" EIA model #LLU20K3, and 4-1/16" FLG model #LLU30K4 sizes available upon request. Body of load is 4" and will operate to frequencies above 6" line size, limit.
- 2) At 766 Mhz, 77°F (25°C) ambient, sea level, 0 PSIG
- 3) Euchatorm or Dowtherm SR-1, or echivalent mixture
- 4) Recommended; With Inlet Glycol/Water temperature within allowable listed above, produce flow sufficient to maintain <54°F (30°C) rise in fluid. Flows estimates 10 gallons for 80 kW, 15 gallons for 100 kW and 20 gallons for 150 kW.
- 5) For more than 5,000' (1,524 m) please consult the factory

An emergency drain has been provided to allow flow in case of a seal failure into the load. A hose must be attached by the user to route that flow to an appropriate drain.

Specifications

Model Number	LLU200K18	LLU200K15	LLU200K11
Input/output connectors	WR 1800	WR 1500	WR 1150
Impedance	N/A	N/A	N/A
Tuning screws	4	4	4

Frequency Range	470-494 Mhz	494-680 Mhz	650-880 Mhz
Average Power at Sea Level ¹	200 kW	200 kW	200 kW
Operating Position	Horizontal; water outlet up	Horizontal; water outlet up	Horizontal; water outlet up
Cooling Method ²	Forced mixture of 50/50 water-ethylene glycol	Forced mixture of 50/50 water-ethylene glycol	Forced mixture of 50/50 water-ethylene glycol
Inlet Water Pressure (Max.)	50 psi (3.4 atm)	50 psi (3.4 atm)	50 psi (3.4 atm)
Inlet Water Temperature ³	102°F to 131°F (39°C to 55°C)	102°F to 131°F (39°C to 55°C)	102°F to 131°F (39°C to 55°C)
Outlet Water Temperature (Max.)	194°F (90°C)	194°F (90°C)	194°F (90°C)
Inlet/Outlet Water Connectors	1" NTP	1" NTP	1" NTP
Max. Altitude ⁴	10,000 feet (3,050 m)	10,000 feet (3,050 m)	10,000 feet (3,050 m)
Ambient Temperature	32°F (0°C) to 113°F (45°C)	32°F (0°C) to 113°F (45°C)	32°F (0°C) to 113°F (45°C)
Storage Temperature	32°F (0°C) to 122°F (50°C)	32°F (0°C) to 122°F (50°C)	32°F (0°C) to 122°F (50°C)
Storage/Ambient Humidity	0-98%, non condensing	0-98%, non condensing	0-98%, non condensing
Length	154" (3900 mm)	154" (3900 mm)	154" (3900 mm)
Weight	215 lbs (97.5 kg)	185 lbs (84 kg)	155 lbs (70.3 kg)

Notes

- 3-1/8"EIA model #LLU20K3, and 4-1/16"FLNG model #LLU30K4 sizes available upon request. Body of load is 4" and will operate to frequencies above 6" line size, limit.
- At 766 Mhz, 77°F (25°C) ambient, sea level, 0 PSIG
- Euchaterm or Dowtherm SR-1, or equivalent mixture
- Recommended; With Inlet Glycol/Water temperature within allowable listed above, produce flow sufficient to maintain <54°F (30°C) rise in fluid. Flows estimates 10 gallons for 80 kW, 15 gallons for 100 kW and 20 gallons for 150 kW.
- For more than 5,000 Ft. (1,524 m) please consult the factory

An emergency drain has been provided to allow flow in case of a seal failure into the load. A hose must be attached by the user to route that flow to an appropriate drain.

Dielectric products are represented in 90 countries around the world. With the rapid expansion of communications, Dielectric is positioned to service the broadcast needs of small and large stations, DTV and NTSC, FM and specialty RF systems, complete systems and components.
