

Dielectric®

PUTS THE
FUTURE OF
BROADCASTING
IN THE PALM
OF YOUR HAND.

OUR GLOBAL POWERLITE™ BRAND OFFERS
BROADCASTERS NEW SYSTEMS
BUILT SPECIFICALLY FOR NEXTGEN TV.

NEXTGEN TV is the new wave of broadcasting designed to greatly enhance over-the-air services for viewers. It provides new options through smart TVs and other Internet-connected devices: 4K video, targeted ads and mobile device reception.

Our new Powerlite™ TFU-WB-LP Series addresses the unique requirements of ATSC 3.0 single-frequency networks (SFNs), offering multiple variations, patterns and software-defined proposal generators to help broadcasters develop perfectly-defined, multi-site low-power antenna systems.

Dielectric's new **Powerlite TFU-WB-LP Series** supports multiple SFN antenna variations and patterns, and includes filters and transmission line to build complete ATSC 3.0 systems
